

## Orphan G-protein Coupled Receptor 27 (GPR27)

|                    |            |                     |                    |
|--------------------|------------|---------------------|--------------------|
| <b>Clone ID</b>    | GPR0270000 | <b>Species</b>      | Human              |
| <b>Gene Class</b>  | GPCR       | <b>NCBI Acc. #</b>  | NM_018971          |
| <b>Date</b>        | 01/07/2011 | <b>Alt. Names</b>   | SREB1              |
| <b>Bacteria</b>    | Top10      | <b>Origin</b>       | cDNA (whole brain) |
| <b>Vector</b>      | pcDNA3.1+  |                     |                    |
| <b>Antibiotic</b>  | Ampicillin | <b>Tag</b>          | n/a                |
| <b>Promoter</b>    | T7/CMV     | <b>Tag Location</b> |                    |
| <b>Insert Size</b> | 1128       | <b>Mutation</b>     |                    |
| <b>5' RE</b>       | BamH1      | <b>Phenotype</b>    | wt                 |
| <b>3' RE</b>       | Xho1       | <b>Sequenced</b>    | Full Length        |
