Complement component 5 receptor 1 (C5a ligand) (C5R1)

CloneID: C5R0100000
Species: human

Gene Class: G-protein coupled receptors

Date: 2/25/2003
Lot: 01

Bacteria: TOP10 f'
Vector: pcDNA3.1+
Antibiotic: Ampicillin
Promoter: CMV

Insert size: 1053 bp
5' RE: EcoRI
3' RE: XhoI

Tag: None
Tag location: N/A
Mutation: wild-type
Phenotype: wild-type
Method: PCR
Sequenced: Full length

GB Acc. No.: NM_001736

Keywords: G-protein coupled receptor, wild type

References

Notes: Identical to GenBank ACC# NM_001736: Complement component 5 receptor 1 (C5a ligand) (C5R1) (wild type) cloned into pcDNA3.1+ (Invitrogen) at EcoRI (5') and XhoI (3'). The open reading frame was amplified by the PCR from Human Genomic DNA. The insert was sequenced. Insert size = 1053bp
