G-protein alpha 15 EE tagged (internal)

CloneID: GNA150EI00
Gene Class: G-protein alpha EE tagged
Species: human
Date: 01
Lot: 1130
Insert size: pcDNA3.1+
Vector: Ampicillin
Antibiotic: CMV
Promoter: Kpnl
5'RE: XhoI
3'RE: Tag: EE (Glu-Glu)
Tag location: I
Mutation: None
Phenotype: wt
Method: N/A
Sequenced: Full length
GB Acc. No.: M63904

Keywords: guanine nucleotide binding protein alpha 15 human EE epitope tagged (internal)

Covance: www.covance.com

Notes: An internal Glu-Glu epitope tag (see reference above) was introduced into the human G-protein alpha 15 subunit (wild type: GNA1500000) via the Quickchange mutagenesis kit (Stratagene). Residues GYVPTA (174-179) were mutated to EYMPTE. The Glu-Glu (EE) monoclonal antibody is available from Covance (BABCO).
