5-hydroxytryptamine (serotonin) receptor HTR1D

CloneID: HTR01D0000
Gene Class: 5-hydroxytryptamine receptor GPCR
Species: human
Date: 12/6/2001
Lot: 01

Vector: pcDNA3.1+
Antibiotic: Ampicillin
Promoter: CMV
Insert size: 1140 bp
5'RE: EcoRI
3'RE: XbaI

Bacteria: TOP10 f'
Tag: None
Tag location: N/A
Mutation: wild-type
Phenotype: wild-type
Method: N/A
Sequenced: Full length
GB Acc. No.: BC007720

Keywords: 5-hydroxytryptamine (serotonin) receptor GPCR

Notes: Human 5-hydroxytryptamine (serotonin) receptor HTR1D (wild type) cloned into pcDNA3.1+ (Invitrogen) at EcoRI (5') and XbaI (3'). The open reading frame was amplified by the PCR from Image clone (4299633). The insert was sequenced and found to be identical with GB ACC# BC007720. Insert size = 1140 bp.
